## PORTFOLIO

### _Braggem_ – Final Project, Carolina Code School

Python, Django, Django-Celery, React JS, React-Bootstrap, React Router, Heroku, Postgres Database, NBA Schedule API

Full stack application built to provide users an exciting experience while following the NBA season. Predict game winners, view leaderboard, challenge other users, and customize your profile while showcasing your game-winner picking skills.

### Freelance Application - redthread through Nicer Studios

React Native, TypeScript, Expo

I'm working with a small team using agile development processes to create an internal sales application for a large agricultural company. My responsibilities include ticket resolutions, weekly standup, and reviewing/approving pull requests. Significant role in visual design architecture.

### Newspaper Application

React JS, Python, Django, Django REST Framework, React-Bootstrap, React Router, Heroku

Full CRUD application designed for three distinct user types:

- The general user is able to view articles on the homepage.
- Authors are able to write articles and submit for review.
- The editor is able to approve articles for publication or reject those articles. He also can archive articles that are live on the homepage and view the archives.

### _Pixel Perfect_

HTML, CSS

Responsive recreation of a blog site that mirrors every element down to the pixel. This project showcases my skill to combine HTML and CSS to match exactly the request of a client.

## ABOUT ME

I stepped away from a comfortable career in coffee to immerse myself in a completely foreign field – a huge risk! It's paid off tenfold as I've discovered I'm incredibly passionate about coding and hungry to grow my skill.

I love frontend development and am looking to master my working knowledge of **React and React Native!**

---

## LANGUAGES

JavaScript, **TypeScript,** Python, HTML, CSS

## FRAMEWORKS

**React,** React Native, Django

## OTHER

Git, Yarn, Expo, Vite, REST APIs, Bootstrap, Material UI, ChakraUI, **PostgreSQL**

## ORGANIZATIONAL SKILLS

Experience working with **Agile Methodologies** and **Kanban boards**.

---

## EDUCATION

### Carolina Code School Greenville, SC

August 2022 - November 2022

Full-Stack web dev certificate.

### Bob Jones University Greenville, SC
_Bachelor of Science, Criminal Justice_

September 2011 - May 2015

## Spill the Beans - Spartanburg, SC — *Store Manager*

March 2018 - August 2022

Personally handpicked a team of 10+ baristas to build and cultivate a brand new business culture in a new city. Managed day to day operations while learning about motivation and servant leadership.

## BMW North America - Greer, SC — *Assembly*

January 2016 - March 2018

Obtained certification and ran 50+ jobs within Plant Spartanburg. Assisted in off-line support duties and trained new hires.

## Spill the Beans - Greenville, SC — *Barista*

October 2009 - May 2015

I was an integral part of the team as I led through my actions and created a culture of hard work and dedication to our craft as a business. Made schedules, closed/opened shop solo, trained new hires, handled cash box/bank deposits and kept up with POS software.
